		Distribution	PO DAAC	24	Weekly Average	77	J
Other Missions	Various Instruments	Archive (L2+)	PO DAAC			7	
		Distribution	PO DAAC	NA	NA	264	K

Notes:

A. Required and actual data volumes are for L0 products only. Higher-level product has not been produced yet. Level 0 volume includes current and past data.
B. The actual L0 data rate from AMSR-E is 6.6 GB/week. This is lower than ESDIS baseline requirement. Updating of the baselined requirements is in process.
C. Production of L2 and L3 products resumed on September 3, 2003.
D. Data from this instrument is not transmitted to DAAC daily.
E. Volumes of ASTER L1A and L1B products are a function of production at ERSDAC in Japan. L1A and L1B volumes include the expedited data sets generated at LP DAAC. ASTER L2 products are produced on demand, and the actual volumes may be significantly different from requirements. In June, LPDAAC started to generate L1B products from L1A ingested. The total archive volume includes L1B products generated at LP DAAC.
F. Includes reprocessed data.
G. Distribution requirements represent the delivered capacity for distribution. Because distribution is based on user orders, the actual distribution volumes may be significantly different from the available capacity.
H. Ingest/archival of MODIS L2+ products is dependent on MODAPS processing schedule.
I. Archival volumes for MOPII L1-L2 at LaRC products are dependent on MOPITT SIPS production schedule.
J. Distribution requirements are weekly averages of media distribution volumes based on subscriptions for a full year.
K. Includes distribution of educational materials.
L. Does not include the MODIS ocean color products processed at SeaDAS (SeaWIFS Data Analysis System).
M. Very little reprocessing of MODIS products was done.
N. Does not include distribution by data pool.
O. Currently distribution of ADEOS-II data is limited to the instrument team members for calibration/validation purposes.
P. Values reported here represent what have been archived at DAACs. MODAPS production may be higher.
Q. No information is available.
R. Total amount of data distributed through Data Pool. Due to unavailability of user characteristics information, further breakdown by user category (e.g., data producers, end users) is not possible at this time.
S. GLAS Laser remains off since November 19, 2003.

Baseline requirements refer to the May 2003 EOSDIS technical baseline. The QA requirements for distribution are the Level 2 requirements based on inputs from instrument teams (ITs). The requirements multipliers are ramp-up factors to account for forward processing and reprocessing. They varies, depending on processing level and launch date. Ramp-up factors used in this table are:

Processing Level	1st year after launch	2nd year	Launch+2 or more year
L0	1	1	1
L1A	1	2	3
L1B	1.015	2x1.015	3x1.015
L2-4	0.5*1.015	1.5*1.015	3*1.015

Please note that browse data volumes for L1B-L4 products are assumed to be 1.5% of product volumes.
